

TABLE OF CONTENTS

ACKNOWLEDGEMENTS.....	9
FOREWORD	11
<i>Karine BERGÈS & Olivier BONDÉELLE</i>	
Varied sentiments among stakeholders.....	11
SAPS at UPEC	12
A cross-cutting commitment.....	13
Chapter 1. General introduction	15
<i>Philippe FROUTÉ & Olivier MEIER</i>	
1. Conceptual framework: Anatomy of distrust.....	15
2. The contemporary vectors of distrust	18
3. Rebuilding trust: Theoretical foundations and pathways to action...	21
Conclusion: Towards a democratic epistemology	23
PART 1. MANIFESTATIONS AND DRIVERS OF DISTRUST	27
Chapter 2. Vaccines, conspiracies and the humanities: Rethinking medical education in times of crises	29
<i>Pierre WOLKENSTEIN</i>	
1. A brief and purposeful history of vaccination	29
2. Ethics has a history and fragile boundaries.....	31
3. The Covid crisis: An unprecedented scientific mobilisation and the persistence of conspiracism	32

Conclusion: Rethinking medical training in the face of crises	33
---	----

Chapter 3. Growing distrust of official statistics 35

Bertrand du MARAIS

1. The evidence and stakes of a growing distrust	36
2. Some suggestions for combating the causes of distrust towards official statistics	46
Conclusion	52

Chapter 4. Distrust of science in the age of contemporary crises: Emotional dynamics, social constructions and transdisciplinary challenges..... 57

Hélène JALIN

1. From the centrality of science to the fragility of its authority	58
2. Emotional dynamics at the heart of knowledge reception	61
3. Digital environments and epistemic radicalisation	64
4. Rethinking science communication and knowledge production.....	66
Conclusion: Towards a reflexive, dialogic and emotionally informed science	70

PART 2. CONTEXTS AND INTERNATIONAL COMPARISONS.....75

Chapter 5. Science in the Czech Republic in the post-truth era: Towards scientific resilience? 77

Ondřej FILIPEC

1. 'Neither good nor terrible'	79
2. The Czech Republic as a laboratory.....	81
3. Building scientific resilience.....	83
Conclusion	88

Chapter 6. The Academic Citizens Assembly (ACA): A constructive dialogue between science and citizens. The Swiss example..... 93

Dominique BOURQUI, Sascha NICK & David CLAIVAZ

1. Distrust of science in Switzerland.....	94
2. Why does democracy struggle with scientific complexity?.....	96
3. Conceptual foundations: How to reinvent a science-based democracy?	99
4. The Academic Citizens Assembly (Aca) as a format for reinventing a science-based democracy	101

5. Lessons from the practice of the ACA	103
Conclusion: Use cases for combating distrust of science through a new discussion and/or decision-making framework such as the ACA ..	106

PART 3. REBUILDING TRUST..... 113

Chapter 7. Governing through critical thinking? Science, trust and the recomposition of contemporary regimes of truth..... 115

Jean-Claude RUANO-BORBALAN & Magalie DEBISSCHOP

1. Reconsidering the ‘crisis of confidence’: shifting from individual attitudes to regimes of truth	117
2. Historicising Scientific Trust: Enduring tensions and institutional reconfigurations	121
3. The ‘crisis of confidence’ as a performative narrative and strategic resource: comparative national frameworks	124
4. Trust as an indicator	125
5. Critical thinking, expertise and scientific democracy	126
6. Digital technology, platforms, and the reconfiguration of truth regimes	129
7. Generative AI and the shift in critical thinking towards infrastructure.....	131
Conclusion	133

Chapter 8. Mediations in people’s history:

A survey on participation 139

Olivier BONDÉELLE

1. Presentation of the survey	142
2. Analysis of survey results.....	148
Conclusion	157

GLOSSARY 161

INDEX OF PROPER NAMES 163

ABOUT THE AUTHORS..... 165
